PAVEROLOGY— Although some manufacturers claim their pavers look 'new' forever - the reality is that **all pavers** weather and require cleaning to restore their "new" appearance. Think of sealing your pavers in the same way you would polish and buff your floors or wax your car. The process restores the original beauty and protects them from future staining.

Fortunately with the revolutionary, new system - **Seal 'n Lock** - you can erase the mellowing effects harsh weather and daily living can have on your pavers. PAVERPROS is an EP Henry Certified Sealing Specialists™, the Seal 'n Lock System™:

- WE can Clean and Enhance your pavers **in just 1 day! Other systems require 2-5 days.**
- Is ecologically safe and child/pet friendly

- Cleans the sediments that develop over time from natural elements like rain, snow, and rotting leaves

Is an aesthetic consideration - you can choose a matte finish or a richer sheen, plus protect against future staining caused by natural elements and food mishaps

...and when performed by a EP Henry Certified Sealing Specialist, you can be assured that the job is done right!

Make the old look NEW
